

*Office Memorandum* • UNITED STATES GOVERNMENT

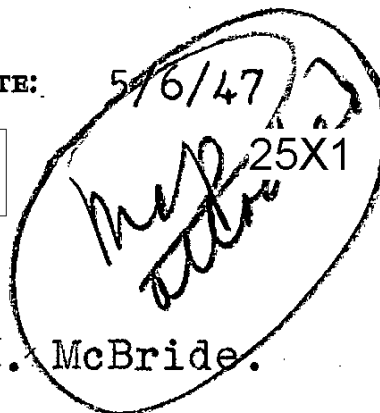

DATE: 5/6/47

TO :

[Redacted]

FROM : NWC - Mr. Dearborn

SUBJECT: Letter from Dr. George M. McBride.

Art:

Attached is an excerpt from a letter which I just received from Dr. McBride and also the enclosure mentioned by him. What do you think we ought to do about the matter?

Attachments:

1. Excerpt from letter of May 2, 1947.
2. Map covering San Francisco Quebrada.

Following is a paragraph from letter of May 2, 1947 addressed to Mr. Henry Dearborn, from Dr. George M. McBride.

Herewith I am sending a copy of a map covering the San Francisco Quebrada, at the southern end of the Cordillera del Condor, which The American Geographical Society would like to consult in the preparation of their map of Latin America. I do not feel free to send this map to the Society at present, though this section of the boundary is entirely done. I am writing Mr. Hitchcock that it is being sent you and that he may consult you about the use of it. I see no reason, myself, why the Society should not avail themselves of any data afforded by this map, but do not feel authorized to submit it to them. You will know what is the Department's attitude in such matters.
